| ID | Summary | Pre-conditions | Steps | tatus | Actual Result | Expected Result | Post-contition |
|---|---|---|---|---|---|---|---|
| -GTAV-E&E-001 | Replay "I Fought the Law" mission - Character switch after cutscene | Mission replay unlocked "I Fought the Law" | 1. Open pause menu<br>2. Navigate to Replay Mission<br>3. Select "I Fought the Law"<br>4. Start Mission and progress through chase sequence<br>5. Observe character after cutscene ends | Fail | Game should switch control from Franklin to Michael and spawn player in correct vehicle and location | Franklin remains active instead of switching to Michael, appears on police bike and later spawns in incorrect locations such as under the bridge | Game remains in correct character state and does not affect gameplay flow |
| -GTAV-E&E-002 | "Father/Son" mission - Use Explosives after Jimmy is rescued | Mission unlocked "Father/Son" | 1. Start mission "Father/Son"<br>2. Progress until Franklin rescues Jimmy from the boat<br>3. Ensure Jimmy is seated inside the vehicle<br>4. Trigger an explosion nearby | Fail | Jimmy is forcefully ejected from the vehicle, and character is launched unusually high into the air | Jimmy remains seated inside the vehicle,<br>Explosion should not cause abnormal ejection or exaggerated physics | Mission progresses to next state or resets based on gameplay outcome |
| -GTAV-E&E-003 | Free Roam - Vehicle collision should cause realistic damage and player response | Player is in free roam mode,<br>Player has access to a standard vehicles | 1. Enter a vehicle.<br>2. Accelerate to high speed.<br>3. Crash the vehicle into a solid object<br>4. Observe vehicle damage and player reaction.<br>5. Repeat collisions multiple times. | Pass | Vehicle shows progressive visual damage like dents, broken parts, physics behave realistically, and player character reacts appropriately to impact | Vehicle damage system should reflect realistic collision physics with visible damage and appropriate player response after impact | Vehicle remains usable or becomes severely damaged depending on impact, player retains control or exits vehicle if destroyed |
| -GTAV-E&E-004 | Free Roam -Trigger wanted level and verify police AI response and escalation | Player is in free roam mode,<br>No active wanted level | 1. Perform a minor crime<br>2. Observe 1-star wanted level activation<br>3. Continue committing crimes to increase wanted level<br>4. Attempt to escape police line of sight<br>5. Hide until wanted level drops | rogress | | Wanted system should dynamically scale police response and allow player to evade by breaking line of sight and hiding | |
| -GTAV-E&E-005 | Verify that all explosive weapons can destroy trailers in Friends Reunited mission | Player can access mission Friends Reunited,<br>Player has access to multiple explosive weapons | 1. Start mission Friends Reunited<br>2. Progress until objective: Destroy the trailers<br>3. Attempt to destroy trailers using all explosive weapons<br>4. Observe whether trailers explode | Fail | Trailers do not take damage or explode when using Railgun, Proximity Mines, Tank, Buzzard missiles, or Jet missiles,<br>Trailers only explode when using Grenades, Grenade Launcher, RPG, or Sticky Bombs | Trailers should be destructible by all high damage explosive weapons consistently,<br>All explosive weapons should trigger trailer destruction | Mission objective state is updated based on trailer destruction |
| -GTAO-E&E-001 | Validate wanted level behavior during "Pizza This" odd job mission when player commits crimes | Player is in an active online public or private session,<br>Player has access to and starts the "Pizza This" Odd Job mission,<br>No active wanted level before starting the mission | 1. Start the "Pizza This" odd job mission<br>2. Begin delivering pizzas<br>3. During the mission, commit crimes<br>4. Observe wanted level behavior | Fail | Wanted level is not triggered during the mission despite committing crimes,<br>Wanted system resumes normal behavior after mission completion or failure | Wanted level should trigger when player commits crimes during the mission,<br>Wanted system should behave consistently during and after mission | Mission ends with success or failure,<br>Wanted system functions normally after mission |
| -GTAO-E&E-003 | Verify vehicle paint behavior when applying Crew Color over an existing Chameleon Paint in GTA Online | Player owns a vehicle,<br>Vehicle already has a Chameleon paint applied,<br>Player is a member of a Crew with a custom Crew Color,<br>Access to Los Santos Customs or Auto Shop | 1. Take the vehicle with Chameleon Paint to any Mod Shop<br>2. Navigate to Respray and then Primary Color<br>3. Select Crew Color and Confirm purchase<br>4. Exit mod shop<br>5. Switch to story mode and return back to online session for the crew color texture to appear on the vehicle<br>6. Call in the vehicle and check the paint | Fail | Crew Color appears selected in UI,<br>However, the vehicle does not retain Crew Color visually,<br>Chameleon Paint effect remains or overrides the applied Crew Color | Crew Color should be visibly applied and persist on the vehicle,<br>Vehicle appearance should match the selected Crew Color consistently,<br>UI selection and actual vehicle paint should be in sync | Vehicle remains with Chameleon Paint (Crew Color not applied visually), causing mismatch between selected option and actual appearance |
| -GTAO-E&E-004 | Verify character appearance when applying outfit components after purchasing a heist outfit | Player owns or has access to the Heist outfits,<br>Player is inside a clothing store or wardrobe interaction point | 1. Open Interaction Menu or access a clothing store wardrobe<br>2. Navigate to Outfits<br>3. Purchase the outfit and Equip the purchased outfit<br>4. Navigate to Tops and then select any Tops<br>5. Observe the character model, specifically arms and upper body | Fail | Character's arms become invisible after applying "No Top" with the selected refuse collectors (the pickup) outfit combination,<br>Visual inconsistency observed in the character model | Character model updates correctly,<br>Arms and upper body remain visible and properly rendered,<br>No visual glitches occur when combining outfit components | Outfit combination (Refuse Collectors + Overcoat Blazer - No Top category) remains applied to the character,<br>Visual state of the character reflects the result of the customization |
| -GTAO-E&E-005 | Verify persistence and ownership integrity of SecuroServ spawned vehicle across session transition | Player is registered as a CEO via SecuroServ,<br>Player has access to CEO vehicles,<br>Player is currently in a populated Public Session,<br>No active mission running | 1. Register as CEO using SecuroServ<br>2. Spawn a CEO vehicle<br>3. Enter the vehicle and move to an active area, and ensure session sync with other players<br>4. While inside the vehicle, pause the game<br>5. Navigate to Online, Find New Session, Invite Only Session<br>6. Accept transition while seated in CEO vehicle<br>7. After loading into new session, observe player state and vehicle presence | Pass | Session transition completed successfully without errors,<br>Player spawned correctly in Invite Only session,<br>Previously spawned CEO vehicle did not persist into new session,<br>No duplicate or ghost vehicles observed,<br>Player was able to spawn a new CEO vehicle normally | Session transition completes without desync or crash,<br>Player spawns correctly in new session,<br>Previously spawned CEO vehicle is not improperly persisted across sessions,<br>No duplication of CEO vehicles occurs,<br>Player can spawn a fresh CEO vehicle normally | Player remains registered as CEO,<br>No unintended vehicle persistence or duplication exists |
| -GTAO-E&E-006 | Verify payout consistency when a business sell mission completes during session transition | Player owns an active business with sellable stock<br>Player is in an active sell mission (delivery phase)<br>Stable connection before transition | 1. Start a business sell mission<br>2. Complete final delivery objective<br>3. Immediately trigger session change (Find New Session) during completion moment<br>4. Load into new session<br>5. Check player balance and business stock | Pass | Reward credited once correctly<br>Stock deducted as expected<br>No duplication or loss observed | Reward is granted exactly once<br>Stock is deducted correctly<br>No duplicate payout or rollback occur | Economy remains consistent<br>Player progression saved correctly |
| -GTAO-E&E-007 | Verify personal vehicle ownership and state consistency when player dies during active delivery interaction | Player is logged into Grand Theft Auto Online<br>Player has an active personal vehicle (insured)<br>Player is engaged in a delivery-type interaction (e.g., sourcing/sell prep)<br>Vehicle is currently in use | 1. Begin delivery interaction using personal vehicle<br>2. Destroy player character (e.g., explosion) while vehicle remains in world<br>3. Respawn player<br>4. Request personal vehicle via interaction menu | Pass | Vehicle ownership remained intact after respawn<br>Vehicle was retrievable via normal systems<br>No duplication, loss, or invalid state observed | Vehicle ownership remains correctly assigned to player<br>Vehicle is either retrievable or returned to storage per design<br>No duplication or loss of vehicle occurs | Player retains full access to personal vehicle<br>Vehicle system remains consistent and exploit-free |
| -GTAO-E&E-008 | Verify consistency of business transaction, player state, and reward allocation when delivery completion overlaps with player death and session rejoin | Player owns an active business with sellable stock<br>Player is in a Public Session with other players<br>Sell mission is initiated and in final delivery phase<br>Player has sufficient health/ammo to proceed | 1. Start sell mission and progress to final delivery<br>2. Complete partial deliveries (ensure progress is registered)<br>3. Initiate final delivery<br>4. At completion moment, trigger player death (explosion/damage)<br>5. During respawn/loading, initiate session change<br>6. Rejoin and verify balance, stock, and mission state | Pass | Mission completion resolved correctly despite death and transition overlap<br>Reward credited once based on completed deliveries<br>Remaining stock updated accurately without duplication<br>No inconsistent mission state or UI issues observed | Transaction is handled atomically (either fully completed or correctly failed)<br>Reward is granted only once based on final delivery state<br>Stock is deducted accurately (no duplication or rollback abuse)<br>Player death does not create inconsistent mission state<br>Session transition does not duplicate rewards or reset progress incorrectly<br>No stuck mission state or UI inconsistency | Business reflects correct stock after transaction<br>Player balance aligns with completed delivery value<br>No residual mission state or exploit opportunity exists |
| -GTAO-E&E-009 | Verify consistency of reward distribution and mission state when session host disconnects during mission completion in a co-op activity | Minimum 2 players in same organization/MC<br>Co-op mission active<br>One player is session host<br>Mission is at final objective stage | 1. Start a co-op mission and progress to final objective<br>2. Ensure both players actively contribute (shared progress state)<br>3. Complete the final objective<br>4. At completion moment, force host disconnect (network off/quit)<br>5. Remaining player continues into post-mission state/session migration<br>6. Verify reward, mission completion, and state for remaining player | Pass | Remaining player received correct reward once<br>Mission marked as completed successfully<br>No duplication or payout inconsistency observed<br>Session migration handled without errors | Mission completion resolves correctly for remaining player<br>Reward is granted once per eligible player<br>No duplication or loss of payout occurs<br>Session migration does not corrupt mission state<br>Disconnected host does not cause rollback or duplicate rewards | Player progression and earnings remain accurate<br>No residual or stuck mission state |
| GTAV/O-E&E-001 | Verify player health behavior when transitioning from GTA Online session to Story Mode after using a personal favorite motorcycle | Player can switch between GTA Online and Grand Theft Auto V Story Mode,<br>Player owns or has a "favorite motorcycle" in GTA Online,<br>Player health is not already at full before starting validation | 1. Call in the favorite motorcycle using interaction menu / MC menu<br>2. Mount the motorcycle<br>3. Observe player health regeneration behavior while seated<br>4. Stay on the same motorcycle<br>5. Switch to Story Mode (Franklin / Michael / Trevor)<br>6. Reduce player health (eg: fall damage, NPC attack, etc.)<br>7. Observe health regeneration behavior after switching | Fail | Regeneration persists even without being on a vehicle on Story Mode,<br>Effect continues across all Story Mode characters,<br>Effect remains active until game restart or loading a different save file | Health regeneration should follow Story Mode mechanics only,<br>No Online specific effects should persist after switching modes | Player is in Story Mode after executing the test steps,<br>Player health state reflects the result of the executed scenario |
| GTAV/O-E&E-002 | Verify explosion damage propagation when explosives detonate near environmental corners and obstacles | Player has access to explosives,<br>Player is located in an area with solid structures (eg: buildings, walls with corners) | 1. Navigate to a location with a clear wall corner<br>2. Place one or more sticky bombs on one side of the corner<br>3. Move the player character to the next side of the corner<br>4. Maintain close proximity to the corner within expected blast radius<br>5. Detonate the explosive<br>6. Observe player damage and environmental impact | Fail | Player does not receive any damage from the explosion when positioned around the corner,<br>Explosion effect does not appear to propagate beyond the obstructing surface | Explosion damage should propagate realistically around corners within a certain radius,<br>Player should receive partial or full damage depending on distance and obstruction thickness | Player remains alive and unaffected despite being within expected blast radius,<br>environment partially damaged |
